

Data Sheet E – Results of Internal Review Committee

Date of Review/Recommendation: November 9, 2007

Water Body Under Evaluation:

Water Body ID #: 1307
Name: Gillum Creek (Class C)
Length of Segment: 2.5 miles
County(ies): Bates

Use Attainability Analysis (UAA) Study:

UAA ID #: 0542
Submitter: BWR
Date(s) Conducted: May 18, 2007
Date Received: June 1, 2007
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
- ☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- ☐ 3-Non-Remedial, Human Caused Condition.
- ☐ 4-Hydrologic Modifications.
- ☐ 5-Natural Physical Features.
- ☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown

Comments: The UAA survey was conducted in May 2007 and no WBCR was observed. Two interviews were conducted during the survey. Both landowners stated they did not use the stream for WBCR, but one of them uses the stream for Secondary Contact Recreation (fishing).

Is the evaluated use attainable? ☐ Yes ☒ No

Comments: The stream did not meet depth criteria at any of the 3 sites evaluated. As a result, data in this UAA supports the 2005 Water Quality Standards where WBCR was not assigned. Due to the interview that revealed SCR (fishing), the SCR designation is recommended to be assigned.

Committee Recommendation:

☐ Add Use ☐ Retain Use ☒ Remove Use
☐ Modify Use ☐ Inconclusive
